Introduction

Welcome to the Bachelor of Science in Biosciences (BS Biosciences) program, an innovative and comprehensive undergraduate degree designed to prepare students for success in the dynamic and rapidly evolving field of biosciences. At Salim Habib University (SHU), we recognize that Pakistan is on the cusp of a scientific revolution and our program is crafted to provide students with a robust foundation in biological principles, theories, and practices, along with the skills and knowledge necessary to excel in various professional settings.

The twenty-first century is the age of biosciences, marked by groundbreaking discoveries such as stem cells, the development of new tools and technologies, advances in computational biology, and multidisciplinary approaches. Our BS Biosciences program aims to equip students with the knowledge and skills necessary to be at the forefront of these exciting developments, making a meaningful impact in the world of biosciences and beyond.

Our program ensures that graduates of the BS Biosciences program gain a comprehensive understanding of multiple domains of biological sciences. This is achieved through interactive classroom sessions and hands-on experiences in well-equipped laboratories and state-of-the-art research facilities. This approach empowers our graduates to make significant contributions at both national and international levels.
