Introduction

The Department of Basic Medical Sciences (BMS) at Faculty of Pharmacy, Salim Habib University. The M. Phil. Program is comprised of a body of coursework, fortified by a research project and thesis. Students participating in laboratory-based research will have opportunities to receive training in relevant laboratory techniques.

M. Phil. program trains students to integrate knowledge and formulate judgments to ensure a highly specialized education and its application in problem solving. This will develop the candidate for the employment requiring decision-making in complex and unpredictable situations and nurture independent learning ability required for continuing professional development.

In addition, highly skilled faculty members are the part of the team. These faculty members have vast experience of working at well-known national and international institutions.
