Introduction

BS Psychology is an interdisciplinary undergraduate program designed to provide students with a comprehensive understanding of psychological principles and their applications in promoting mental health and well-being. This 4-year program integrates traditional psychology coursework with specialized training in well-being, health psychology, and positive psychology.

Why BS Psychology from SHU?

International standard cutting-edge curriculum:

Our BS Psychology curriculum combines global psychological theories with advanced research techniques, providing students with a comprehensive understanding of human behavior. It emphasizes critical thinking, cross-cultural perspectives, and evidence-based practices to prepare graduates for diverse psychological careers and further studies.

Hi-tech laboratories for real world applications and research:

Hi-tech laboratories offer state-of-the-art tools and technology, enabling students to conduct real-world psychological experiments and research. These labs foster hands-on learning and innovative investigations, bridging theory with practical applications in fields such as cognitive neuroscience, behavioral analysis, and clinical psychology.

Experiential and project-based learning:

Hands-on learning in BS Psychology immerses students in real-world psychological scenarios through hands-on activities, case studies, and collaborative projects. This approach enhances understanding by applying psychological concepts to solve practical problems, fostering critical thinking, creativity, and professional skills essential for careers in psychology.

Career-focused marketable and entrepreneurial skills:

Our program focused on career-oriented, marketable, and entrepreneurial skills equips students with the ability to apply

psychological principles in diverse settings. It emphasizes skills like communication, problem-solving, and business acumen, preparing graduates for roles in mental health services, human resources, consulting, and entrepreneurial ventures in the psychological field.

Personalized industry mentorship for nurturing entrepreneurial ideas:

Personalized industry mentorship in BS Psychology connects students with experienced professionals to nurture entrepreneurial ideas and guide career development. This mentorship fosters innovation by providing tailored advice, industry insights, and support, helping students transform their psychological knowledge into successful ventures and impactful careers.

Opportunities for international exposure and mobility through competitions and exhibitions:

This program offers opportunities for international exposure and mobility through global competitions and exhibitions, allowing students to showcase their research and innovative ideas. These experiences broaden perspectives, enhance cross-cultural understanding, and connect students with global networks in the field of psychology.

Support and guidance from highly experienced and well-qualified faculty members:

In the BS Psychology program, students receive support and guidance from highly experienced and well-qualified faculty members who bring diverse expertise and cutting-edge knowledge to the classroom. This mentorship enhances learning by fostering critical thinking, research skills, and professional development in various psychological fields.

Industrial Advisory Board (IAB)& Platforms

- Comprise mental health and wellness professionals including psychology experts and academicians, consultants, hospital and clinic personnel, HR counsellors, career placement experts, and health department specialists.
- Guide students to professional excellence, fostering an in-depth understanding of industry trends and best practices.
- Foster students' technical and professional development, ensuring their ability to secure job placements and entrepreneurial opportunities.
- Provide valuable networking prospects for students, connecting them with industry leaders and potential employers.
- Promote collaboration between academia and industry, ensuring the curriculum stays relevant and aligned with current industry needs and advancements.
