Overview

The Department of Pharmacognosy is dedicated to providing students with a foundational understanding of natural products and their applications in medicine. Our curriculum covers essential topics such as the identification, extraction, and analysis of plant-derived compounds, as well as their therapeutic properties. Through a combination of theoretical coursework and hands-on laboratory experience, students will explore the significance of herbal medicines, phytochemistry, and pharmacological effects. The aim of our teaching faculty is to equip future pharmacists with the knowledge and skills necessary to incorporate natural products into modern healthcare practices effectively.

Programs

Vision

The aim of the department is to be a leading center for innovative research in natural products, contributing to the discovery and development of new therapeutic agents. We pledge to provide high-quality education that equips students with a deep understanding of the phytochemistry and therapeutic uses of natural compounds.

Mission

Our mission is to deliver high-quality education that empowers students with a comprehensive understanding of phytochemistry and the therapeutic applications of natural compounds. We are dedicated to fostering critical thinking and research skills that enable our students to explore and innovate in the field of pharmacognosy. By integrating theory with practical experience, we aim to prepare the future pharmacists to advance the use of natural products in healthcare and contribute to the well-being of society.
