## **Modern Infrastructure**

The Salim Habib University campus boasts infrastructure that is at par with the contemporary architecture of the world's most renowned and top-ranked universities.

The largest of the building structures at SHU, our five-storey Academic Block, houses all instructional spaces; including classrooms, seminar halls, and science and engineering laboratories. All these spaces are equipped with state-of-the-art teaching and learning equipment and aids. They are centrally air-conditioned and well spread out, with a focus on air circulation. The Academic Block also houses community spaces such as three lecture theatres with the capacity to seat up to 100 students each, a multi-purpose event-hall-cum-auditorium with a capacity of 350 students, and an expansive cafeteria built according to international standards that can serve as many as 350 persons at a time.

The SHU campus has been built to provide students with a well-balanced combination of aesthetically pleasing academic and recreational facilities that work together to create a comfortable, stimulating, and enriching environment. The campus's architecture gives off an aura of openness and greenery while maintaining an image of contemporary grandeur.

The campus provides an ideal environment for young minds to explore new ideas and encourages independent thinking, creativity, and innovation.
